Principles of Mathematical Physics

In Physics, it is also common to write a_i for (the components of) the vector a , and the scalar product $a \cdot b$ is then written $a_i b_i$ with the convention that repeated indices are to be summed over all their values, in this case $i \sim 1,2,3$ Finally, an alternative notation for the scalar product is h_a, b_i which is closer to the bracket notation e_m -
